13 August 2013

Dear Sir,

Please accept this letter as confirmation that the RICS is happy to support The Learning Machine's submission to Ofqual of the following QCF qualifications:

- TLM Level 1 Certificate in Design, Engineer, Construct.
- TLM Level 2 Certificate in Design, Engineer, Construct.
- TLM Level 3 Award in Design, Engineer, Construct.
- TLM Level 3 Certificate in Design, Engineer, Construct.
- TLM Level 3 Diploma in Design, Engineer, Construct.
- TLM Level 1 Certificate in Enterprise and Preparation for Employment.
- TLM Level 2 Certificate in Enterprise and Preparation for Employment.

The qualifications are especially suitable for the 14-19 age range and provide support for the skills needed in our sector in appropriately practical contexts. A balanced education requires both academic and work related aspects, and we believe the innovation in these new qualifications can help provide the choices necessary for professionals in schools to achieve the optimum balance for individual children.

This is a truly inspiring initiative that will bring to life the world of design, construction and engineering to many school children around the UK. RICS is committed to developing skills in Land, Property and Construction and in particular bringing it to life for the next generation.

Yours faithfully,

Matt McDermott  
Sales and Marketing  
Director RIGS UK
