12th April 2018

Dear Paul

Please share this letter with the various agencies that you work with when delivering and supporting your qualifications.

To whom it may concern:

The Open University Cisco ASC has been working with TLM for several years on their STEM based qualifications, though our area of specialisation in (IT, Engineering etc). We have been involved in advising TLM about the content and nature of the qualifications and the nature of assessment so that we can give our industry understanding of our own requirements. This will hopefully ensure that students who complete these qualifications will be well equipped to work in our sector and will have the grounding in skills, knowledge and understanding to take their studies further academically or professionally.

Based on this collaboration, I am happy to endorse the following qualifications as being an excellent grounding in a career in the industry we represent.

- 601/1024/X – L2 Certificate in Open Platforms and Digital Skills
- 603/2817/4 – L1 and L2 Certificate in User Skills and Digital Technologies
- 601/4276/5 – L2 Certificate in Open Systems IT Management
- 603/1452/7 – L2 Certificate in Cyber Security and Digital Forensics
- 601/8775/X – L3 Certificate in User Skills in Cloud Systems and Services

Please feel free to contact me if you require additional information.

Yours,

A handwritten signature in black ink, appearing to read "A Smith".
